

FICTIONAL DEMONSTRATION

Catalog comparison with a clear source trail.

An accessory catalog imported, mapped, reviewed and exported in the working local application. Every observation links to unchanged source rows.

12 older records	12 newer records	12 comparison groups
------------------	------------------	----------------------

7 changed, 2 unchanged, 1 added, 1 absent and 1 ambiguous group.

5 accept 1 reject 6 hold

Twelve illustrative decisions were explicitly saved. Seven groups need further information.

A reviewed price change

000418 - USB-C hub, 7 ports

34.90 to 36.90 USD per unit. Delta: **+2.00 USD/unit**.

Both rows explicitly retain unit each, pack 1 and case 12.

000418

exact match · changed Price, Stock quantity

OLDER SNAPSHOT

Catalog-before-fictional.csv / CSV / row 2

USB-C hub, 7 ports

Identifier: 000418

Price: 34.90 USD

Basis: unit · unit: each · pack: 1 · case: 12

Stock: 42

NEWER SNAPSHOT

Catalog-after-fictional.xlsx / Fictional after / row 2

USB-C hub, 7 ports

Identifier: 000418

Price: 36.90 USD

Basis: unit · unit: each · pack: 1 · case: 12

Stock: 38

Price delta: 2 USD per unit · same explicit basis

Reviewer decision

Review note

Accept

Demo review: USD/unit increased 34.90 to 36.90 (+2.00); each, pack 1 and case 12 are unchanged. Source stock 42 to 38 is retained.

Save decision

Reviewed 10/2/2026, 12:48:31 PM

Actual saved application card. Trace: older CSV row 2 and newer worksheet row 2. Full filenames and SHA-256 hashes accompany both sources in the reports.

What this package contains

Two fictional input files, the final six-tab XLSX report, a PDF of every observation, an unresolved-issues list, eleven actual UI screenshots and source hashes. The README includes all column mappings and reproduction steps.

Six holds and one rejected change

Further information is needed before using these seven observations. Original identifiers, metadata and rows remain intact.

Identifier	Retained observation	Information needed
000421	Not present in newer input	Confirm snapshot coverage and intentional omission. Absence does not establish discontinuation.
000424	USD changed to EUR	Confirm intended currency. No conversion or price delta is inferred.
000425	Duplicate mouse ID	Supply a unique code for each variant. Two older and two newer rows stay together for review.
000426	Raw unit: ' N/A '	Supply an explicit unit. The 4.75-to-5.00 amount change has no price delta while its unit is unknown.
000427	Case changed to pack	Confirm selling basis and pack/case definition. Equal 90.00 USD amounts do not establish equivalence.
000428	Present only in newer input	Confirm item eligibility and snapshot coverage before using the added observation.
Stand ID*	Description rejected for use	Confirm whether folding and adjustable refer to the same variant. Exact identifier matching remains visible.

* Exact stand identifier: **00000123456789012345678901234567890**. Full row references and notes are in the application reports and unresolved list.

Pilot scope

Up to 100 selected records per input and 2 MiB per file. UTF-8 CSV and plain XLSX. Price deltas require equal explicit currency, basis, unit, pack and case metadata. Unknown stock differs from zero. Decisions record observations and do not change a store.

The application runs locally and preserves source files. This demonstration had no buyer participant. No human delivery time, customer outcome, saving or sales revenue is claimed.
