Interpretation

Exact text identifiers only. Duplicates and numeric/scientific identifiers require review. Unknown stock differs from zero. A removed row is not present in the newer snapshot; it does not prove discontinuation. Price deltas are shown only when currency, basis, unit, pack, and case are explicitly present and equal. No currency conversion or pack equivalence is assumed. Accepted rows are reviewed observations; this report makes no live-store changes.
Noto Sans fonts are embedded. Tested text includes accented Latin, Greek and Cyrillic. Export is held if a character has no supported glyph; exact source text remains in the session and XLSX.
